WHEELING, JUNE 15, 1894.

Hon, William L. Wilson.

The presidency of the West Virginia. university is to be kept open for Hon. William L. Wilson, so that if his health shall not permit him to run for Congress he may go back to the university. This recalls that Virginia hotel keeper who had eggs good enough to scramble but not good enough to boil. Mr. Wilson would be a good president of the university, but this is not the point.

The truth of the matter is that the

free traders, including Mr. Wilson himself, are in a state of mind about Mr. Wilson's district. They fear that it may be carried by a Republican, especially if Mr. Wilson be the Democra-

They do not want to lose the district. and above all that feel that they cannot afford the defect of the chairman of the ways and means committee and father of the house tariff bill, so far as that measure has a responsible sire.

The situation to-day is just as the INTELLIGENCES said it was several weeks ago; the candidacy of Mr. Wilson is feared and not yet resolved on. There will be some more able thinking before a decision is reached.

A NEW timber-killing worm has been discovered in this state. Were there not enough before?

#### McKinley in 1896.

Taking up the attack on Governor McKinley in Col. A. I. Conger's Akron newspaper, the Cleveland Leader has been looking into the situation. Of 6,000 Republicans in Akron six are known to be opposed to McKinley's nomination for President. One of these says the attack was very ill advised.

Substantially all Akron is up in arms on account of the bitter assault on Governor McKinley, who is in great favor as a man and a presidential possibility. It is easy to agree with public sentiment in Akron that Col. Conger has made a great mistake. He has in effect told-the public that he had a sore spot somewhere about him.

Notwithstanding that, Governor Mc-Kinley is, and will continue to be, the first choice of many Republicans who are not asleep.

Wigns Dick Croker was a professional prize fighter he did not run away to Europe. He stood up and took his medicine like a man. But then he had not so much at stake.

### Soldiers Going Home.

The Second regiment has gone home and is doubtless glad to be relieved. The men bore themselves well while they were here. It is to be hoped that it may soon be safe to relieve the re-

It is time to get back to the paths of peace. Experience should have taught those who were engaged in lawlessness that they can gain nothing in that way. Moreover it is a bad way which renders liable to prosecution everybody who engages in it.

If the civil officers do their duty ar rests, prosocutions and punishment will from the riotous proceedings. None of this would have been necessary if there had been no lawlessness.

Ir is noticeable that in the matter of renomination Republican congressmen are faring botter than the talent on the Democratic side. Here we have some significance.

### The District Over the River.

After a fair field and a free fight the Republicans of the district over the river have chosen Captain Danford to regain the seat in Congress from that district. The nominee is entitled to the cordial support of every protectionist in the district. He will make an active campaign and will be elected.

Service in the house of representatives will be no new thing to Captain Danford, He will resume business at the old stand and take up the work as a veteran legislator. He will represent the district honestly and ably.

Pittsungit is making a mighty effort to raise \$75,000 for the entertainment of the Grand Army of the Republic. In ordinary times the thing would be done without trouble. It will probably be done in spite of the times.

THE Lexow committee has discovered that New York's police department costs \$15,000,000 n year, \$5,000,000 in apthat New Tork's ponce department costs \$15,000,000 a year, \$5,000,000 in appropriation and the remainder in blackmail. This may explain in part how Croker got rich so fast and how other talent has prospered beyond all com-

mercial possibilities. More is to be expected from a committee which has learned so much of importance in so short a time.

Thomes for Our College Boys.

From the title of an oration or thesis it is not always possible to infer the subject matter, but on this year's programme of the state university commencement exercises are a few titles which tell their own story. Two deal with West Virginia building stones, one deals with the calorific power of West Virginia coals, one describes a design for a central power plant, and one gives the results of an experiment with varieties of radishes. These are practical themselves and indicate study on useful tines.

The treatment of topics having to do with the resources and development of the state is especially useful and praiseworthy. To treat these quos tions requires a study of them, a work in which the university may well take the lend.

If every year the graduating class of this institution were to produce half a dozen good papers relating to the resourcus of the state and its development the state could well offord to print and circulate them; and if the state were to refuse to do it a way would be found to give them circulation. The lead of the university would be followed by other

institutions of learning in the state.

One result would be a body of young men thoroughly instructed with regard to what is in the state and what use it may be put to, and deeply interested in it all, "Night Brings Out the Stars," "Boyond the Alps Lies Italy," and kindred topics have the approval of long usage, but they have not the practical value of practical things which make for the up-building of a state.

Light-weight clothing, a straw hat, simple diet and a good conscience are great helps in hot weather.

National Guards of Two States Ohio and West Virginia have had to call out their troops for a similar purpose. They lie on opposite sides of the Ohio river and virtually in the same locality. The Ohlo enlisted men receive two dollars a day while they are in service; they are not only promised their pay but they get it. They have also an allowance of forty cents a day for rations

The West Virginia enlisted men are paid eighty cents a day, although those who were out some time ago in the southern part of the state have not yet been paid for their service. Their allowance for rations is thirty-five cents a day.

The contrast of treatment does not end here. In every way Ohio takes better care of her national guard than West Virginia does. West Virginia cannot expect to have as numerous a body of troops as Ohio has, but she can be expected to accord as good treatment to those she has.

The prompt response of the men who are stationed in Marshall county has not only preserved the peace, but has undoubtedly prevented destruction of property. Our boys in blue are entitled to better treatment.

The senate engar investigating committee is not working itself to death. Also it is not very exacting. When it gets hold of a witness who has some thing in him the committee is in a hurmy to let go, seemingly because it fears it may get something out of him. This must please everybody who does not prefer to be caught with sugar on his fingers.

THE police authorities of New York support the party of free trade and levy a tariff for "protection" on the keepers of saloons, gambling hells, policy shops and houses of prostitution. To say the least they are inconsistent to the tune of about \$10,000,000 a year.

Now for a whaling big Republican majority in the district over the river. Capt. Danford will do his part, and every Republican must wheel into line to do the best that is in him. This is own campain.

SOMEBODY in Washington is rash enough to predict that by the middle of August Congress will have finished what it is pleased to call its business. The country would like a chance to resume the business suspended by this Congress.

Tue other fellows are getting ready to turn on Croker, All they ask is immunity for themselves. Tammany is toppling, and with it the seemingly in vincible Democracy of New York,

Wirit Tammany torn and bleeding the New York Democracy will be in a sad way in the next campaign. The sugar trust will have to come down more handsomely than before.

WHILE in Europe Rev. Dr. Parkhurst will receive the news from home with one kind of feeling, Boss Crocker with another. The two men are not capable of the same sensations.

### BREAKFAST BUDGET.

During the New Zealand Prohibition elections, at which women voted, the men were supplied with cakes and coffee by the women, who manned the polls. Brass Bands were hired by the enthusiastic females and they carried on for all the world like men voters.

A pointer dog has gotten its master, James D. Brewster, of Wolcott, N. Y., in trouble by devouring vogetables belonging to neighbors. A neighboring farmer has brought action against Brewster "for trespass and malicious mischief by canine proxy."

### The Moorish Crists.

Madero, June 14.—The Correspondencia says that in reply to Spain's request that the powers act in concert in the year for the people to make their Morocco in order to maintain the statu quo and avert civil war, Italy has agreed to the principle of the request, but expressed the desire that the powers should act with prudence and deliberation. Great Britain, it is added, has accepted Spain's suggestion with reserve and Germany has done the same. France, as already cabled, has acceded to Spain's request.

Organizer Witson's Arrest.

FROSTBURG, Mr., June 14.-The news that organizer Wilson had been arrested in Longconing and taken to Cumberland by Sheriff King charged with con-spiracy, caused a sensation among the Frostburg miners. For some days a break has been expected in Lonacon-ing, Wilson was there almost con-stantly and has used every effort to pre-vent the miners going to work.

IRON AND STEEL OUTLOOK,

Prices of Bessemer Eucourage Prepara tions to Resume-Soft Steel Trade at Sea. New York, June 14 .- The Iron Age will say to-morrow regarding the iron and motal trades: A good deal of Bessemer ore has been sold during the past three or four weeks and an advance of about 10a15 cents per ton over the lowabout 10a15 cents per ton over the lowest prices has been secured for delivery during the next three or four months \$11 00a11 00. \$25 is being asked for Bossemer pig in the valleys. The prices at which Bossemer is held have encouraged preparations to start some idle plants and have caused some furnaces which run ou foundry iron usually to ewitch oil on Bessemer. The set steel trade is still at sea. Chicago appears to be the most active market in some of the leading lines. Throughout the east the demand in every line continues exceedingly slow. In fact the indifference of buyers in face of threatened scarcity has been phenomenal. The lake Superior copper companies have made a for copper companies have made a broad sweep and have sold twenty-five million pounds at 9 cents. The inva-sion of trade by the electrolytic copper has finally driven them to drastic meas-

### Dangers of Dress.

How Men and Women Run Great Bisks
During the Summer in the Way They are
Clothed.

Fow people think at this time of the year of
the great importance of dress.

In the winter people dress warmly because
they know it is a necessity, but in the summer,
when it is hot, they go to the other currents and ven dress too lightly. Hot weather causes peo-

even dress too lightly. Hot weather causes souple to use light-clothing; but suddenly the wind changes, the air becomes chilly, and a cold is pretty certain to be the result.

Now, where most people make a mistake is in not guarding against these sudden changes quickly and in time. Any man or woman who has on a light suit of clothing, and feels a change which british a chill should at once counterat. has on slight suit of clothing, and feels a change which princs a chill, should at once counteract the chill. This can only be done by the use of some pure wimulant, not singers or hot drinks, but a pure medicinal whiskey that will refresh the system, cause the blood to circulate, and bring about immediate re-action. There is but one medicinal whiskey that will do this, and that is Deith's Dure Malte. It has for twenty years accomplished what has never been known before in countersetting the first symptoms of

before in counteracting the first symptoms of sudden colds and preventing the possibility of pucumonia, fevers and all the distressing com-plaints which follow any cold.

It should be remembered, however, that luftly a Pure Mait is the only whiskey which will certainly accomplish this, and however much dealers may talk to the contrary, it alone should be acked.
